***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 5-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Pat. No. 6,274,520 to Cordell in view of U.S. Pat. No. 4,052,243 to Yazawa et al.

Claims 1 and 5-6, Cordell discloses a waterproof fabric that is employed on a healthy bed for nursing (col. 2 lines 45-50), which is characterized in its bed body being a fabric which is woven by waterproof fiber strands and has meshes that are breathable and washable thereby allowing liquid and air to pass through (col. 3 lines 34-44).

Cordell is silent to employing warps and wefts in a reticular material. Yazawa discloses a reticular material constructed from warps and wefts that are fastened and coated with a glue (col. 4-5 lines 65-68 & 1-2). It would have been obvious for one having ordinary skill in the art at the time of the invention to manufacture the woven materials with warps and wefts that are glued in order to form a reticular glue membrane thereon (col. 5 lines 1-2). Cordell also fails to disclose the meshes are longer than or equal to diameters of warps and wefts and should be shorter than 30 times of diameters of warps and wefts. It is considered an obvious modification to alter the dimensions of the meshes and it would have been obvious for one having ordinary skill in the art at the time of the

invention to employ the dimensions as stated above in order to provide an alternative design for the meshes.

### ***Response to Arguments***

Applicant's arguments filed 8/15/08 have been fully considered but they are not persuasive.

In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971). In the instant case, Cordell discloses a waterproof fabric comprised of cloth that is breathable and washable. Yazawa discloses method of producing a cross-laminated cloth from wide warp and weft webs of fibers. As previously stated the combination of references as a whole would merely provide a waterproof, breathable and washable fabric made from a cloth having wide warp and weft webs.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
